

COMPANY OVERVIEW

- For 30 years, The Halal Guys have delighted customers with authentic, Middle Eastern and Mediterranean-flavored food, starting out in NYC.
- The Halal Guys is a franchise, with over 400+ new restaurants in development worldwide.

“ We were looking for a solution that would eliminate security and theft concerns, as well as the issues that come with cash being handled by multiple people. We also wanted to provide our investors with more accurate reporting and greater transparency. AMSEC CashWizard Smart Safe delivered all of this and much more. ”

PROBLEM

Limited Cash Management Oversight Caused Consistent Discrepancies

- Managers had to count and verify the bank deposit by hand, leading to a broken chain of cash custody with zero accountability—from the time the cashier put the money in the till until it was deposited into the bank.
- Deposit errors fell back on the managers—who had to count the cash by hand before making twice-daily trips to the bank.
- Multiple people in each restaurant had total access to the money on hand—and the combination to the safe.
- **Why was the cash count wrong more times than it was right? Was it due to human error? Manager fatigue? Was someone stealing?** Because they used a traditional safe there was zero cash management oversight at the restaurants.

SOLUTION **The CashWizard Smart Safe by AMSEC**

- Money received from the customer goes directly into the smart safe. An instant counterfeit check (no more counterfeit detection pens) is then performed and creates a log of exactly how much cash is on hand.
- At day's end, The Halal Guys' cashiers count their drawers to the starting balance and avoid confrontations that might otherwise occur if the drawer is short.
- AMSEC Cloud access allows owners and managers to remotely perform reconciliations, onsite or off, providing improved accuracy, easy access and greater transparency.

“ The AMSEC CashWizard Smart Safe provides heightened security and more hands-on, clear-cut visibility. The improved efficiency has saved time and money and everyone likes that, including the investors. ”
