

# AMSEC Change Exchange: Say Goodbye to Change-Order Headaches

AMSEC Smart Safes will save your retail business time and money by simplifying change orders and cash management practices. Having the right tools in place can help streamline your business processes and improve your bottom line.

Our Smart Safes allow you to:

- ☑ Streamline change-order placement and tracking
- ☑ Make fewer trips to the bank
- ☑ Gain online visibility into your cash deposits and change orders online
- ☑ Securely store cash

**AMSEC's CashWizard Smart Safes** directly connect to banks or third party financial institutions to place change orders. Simply deposit your change-order payment into the safe and then select the change-order denomination you'd like. You are debited when the order is placed and credited when the daily credit file is sent to your bank. This greatly simplifies reconciliation at the end of the day.

Our patented change-order technology helps you focus on running your businesses instead of making daily bank runs. CashWizard Smart Safes are programmed to include bank cut-off times, lead times, denominational requirements, as well as minimum and maximum orders. To save time, a standing order can be configured and automatically placed when the change order is submitted.

AMSEC's Smart Safes help you save time spent on manual counts by incorporating an innovative cloud-based technology to provide connectivity and access to analytics, critical business data, and daily reports.
